|--|---|--|--|--|---|---|--|--|---|
| | | | | Capability | Any data generated in the course of using the capability | > in the implementation or use of the capability. | > in connection with the data generated in the course of using the capability. | > prevent or impair the successful implementation, configuration, customization, maintenance, support, or use of the capability. | > prevent or limit the use, exchange, or portability of any data generated in the course of using the capability |
| Public Health Immunizations: Allows users to send unsolicited immunization messages to state/county immunization registries as well as query the immunization registry for information as per the 2015 edition certification requirements. | X | | One-time licensing and annual software maintenance fee. Installation and testing fees are also required. | Base licensing includes connection to 1 registry | Additional fees will apply should the customer wish us to host the interface in our data center. Fees are based on the server requirements, length of contracts and other criteria to accommodate customer's specific requirements. | By default, base licensing includes connection to 1 registry. Additional licensing will be required for additional connections. | None | The interface will require space on an existing server or a new server. Optionally eMedApps can host the interface server at our HIPAA compliant data center for additional charges. | Messages archived on eMedApps' hosted, HIPAA compliant, servers will be retrieved and furnished to the provider within 5 business days of a written request being received by eMedApps. |
| Syndromic Surveillance: Allows users to send messages based on the Public Health Information Network (PHIN) Profile for Syndromic Surveillance to state/county as per the 2015 edition certification requirements. | | X | | | | | | | |
