

Automatic Care Guidelines for NextGen Ambulatory EHR Makes Using Care Guidelines Easier

Automatic Care Guidelines Makes Providers Happy!

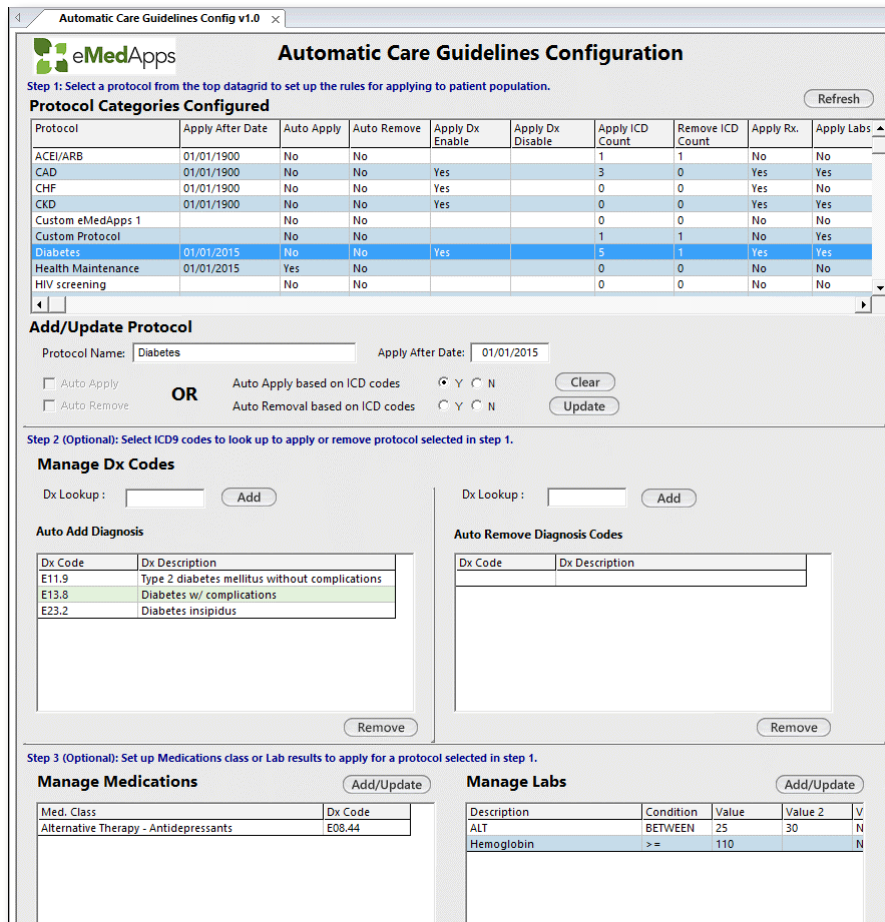

Are your providers complaining about using Care Guidelines in NextGen EHR?

Would it help if Care Guidelines were automatically applied each night based on criteria in the patient's chart, including Diagnosis Codes, Medications and Lab Results?

Would your providers be happy if it was easier to meet quality measures?

Would everyone be better off if we could make this happen?

We've made using Care Guidelines Smarter, Faster and Easier!

Automatic Care Guidelines Configuration

Step 1: Select a protocol from the top datagrid to set up the rules for applying to patient population.

Protocol Categories Configured

Protocol	Apply After Date	Auto Apply	Auto Remove	Apply Dx Enable	Apply Dx Disable	Apply ICD Count	Remove ICD Count	Apply Rx.	Apply Labs
ACEI/ARB	01/01/1900	No	No			1	1	No	No
CAD	01/01/1900	No	No	Yes		3	0	Yes	Yes
CHF	01/01/1900	No	No	Yes		0	0	Yes	No
CKD	01/01/1900	No	No	Yes		0	0	Yes	Yes
Custom eMedApps 1		No	No			0	0	No	No
Custom Protocol		No	No			1	1	No	Yes
Diabetes	01/01/2015	No	No	Yes		5	1	Yes	Yes
Health Maintenance	01/01/2015	Yes	No			0	0	No	No
HIV screening		No	No			0	0	No	No

Add/Update Protocol

Protocol Name: Diabetes Apply After Date: 01/01/2015

Auto Apply **OR** Auto Apply based on ICD codes Y N

Auto Remove Auto Removal based on ICD codes Y N

Step 2 (Optional): Select ICD9 codes to look up to apply or remove protocol selected in step 1.

Manage Dx Codes
