

Azure Cloud Services

High-performance, secure cloud hosting for your applications

Keep your applications safe and secure in an Azure hosting environment with flexible architecture customized to meet your needs. Our dedicated team of experts will manage your infrastructure and your data so that you can focus on patient care. The MTS Azure Cloud provides “plug-and-play” access to your applications to safeguard your data control costs.

HIGH-PERFORMANCE AZURE CLOUD INFRASTRUCTURE

Give electronic health records and other clinical and business applications higher performance and more reliable access anywhere your users need to connect.

CERTIFIED SECURITY

Azure’s HITRUST certified environment offers confidence in the industry’s most rigorous security framework.

BEST PRACTICE MIGRATION SERVICES

Our data conversion team will extract data from your old system, cleanse and convert that data to meet the requirements of the new system, and populate the new system.

SCALABLE ARCHITECTURE - PREDICTABLE COST

Scale your technology systems as your needs change, with no capital costs upfront. You’ll always have the most up-to-date infrastructure with no budget surprises.

CONTINUOUS AVAILABILITY

Rest easy with a solution that offers multiple layers of redundancy, a configurable DR, 24/7 Network Operations Center (NOC), Security Operations Center (SOC), Managed Detection and Response (MDR), and air gapped backups.

DOWNTIME SOLUTION

A comprehensive downtime solution – eMedApps CareFinity® EHR Downtime – will equip your clinical team with the data they need to provide care in any situation that causes EHR downtime, like Internet interruptions and power outages.

HOSTING PACKAGE FEATURES

MTSCloud hosting services include:

- Managed detection and response (MDR)
- Performance management
- Daily offsite air-gapped backups
- Managed firewall
- High availability
- Enterprise endpoint security
- VPN management
- Print management
- Included eMedApps CareFinity® EHR Downtime application

CERTIFIED APPLICATION SUPPORT

MTS can support, host, and/or manage a full range of EHR/EMR and other applications with certified resources across:

INDUSTRY RECOGNITIONS

MTS is trusted by over 10,000 providers and safeguards the ePHI records of over 18 million patients nationwide.

The Health Information Trust Alliance (HITRUST) Security Framework has become the information protection framework for the healthcare industry. It is the industry gold standard and the benchmark against which organizations measure themselves when charged with safeguarding PHI. Certified status demonstrates that MTS has met key protection requirements related to how information is accessed and stored in a cloud environment. It also places us in an elite group of organizations worldwide that have earned this certificate.
