

Serving Rural Health Centers for Over 20 Years

Overcome resource strain and stabilize rural health operations with:

- EHR Migration and Data Conversion
- HRSA, Medicare/Medicaid, RHT Reporting
- Managed EHR Cloud Hosting
- EHR Applications Support, Optimization, Customization, and Proactive System Maintenance
- Revenue Cycle Management
- AI-Powered Data Integration
- EHR Downtime and Archive
- End-User Help Desk and Infrastructure Management
- Managed Security and Compliance
- RHT Program Funding Utilization Strategy and Deployment

EHR SYSTEM SUPPORT, OPTIMIZATION, CUSTOMIZATION

Leverage the expertise of certified EHR consultants who can navigate system nuances and handle the challenges you may have with your specific application. With MTS, reduce EHR burden and provider burnout through continuous optimization and proactive issue mitigation across your EHR system's lifecycle.

REVENUE CYCLE MANAGEMENT, OUTSOURCING, AND MEDICAL BILLING

Overcome workforce shortages and complex payer requirements. Boost patient payment collections, drive cash flow, optimize charge capture, and reduce days in A/R. With RCM360 by MTS, recoup lost revenue and drive financial success for your rural hospital or RHC.

IT/INFRASTRUCTURE MANAGED SERVICES

Routine maintenance tasks like patching and software updates that are not addressed in a timely manner can impact security. Reduce frustrations for both staff and patients by offloading day-to-day IT support to MTS' support center. Grant your team freedom to focus on higher-value IT projects and patient care.

MANAGED CYBERSECURITY AND COMPLIANCE

Get the protection you need to keep your data secure and stay compliant. Leverage the combined IT and cybersecurity expertise provided by our Managed Security Services Platform (MSSP) to deal with complex, extensive data architectures and manage multiple security applications. Start your path to security maturity to strengthen your rural health organization's security posture.

DATA INTEGRATION

Easily share, manage, and access data across healthcare enterprises and information systems to create a truly integrated network. Cost-effectively interface with EHRs, HIEs, devices, and systems for interoperability across your full IT journey.

MANAGED EHR CLOUD HOSTING

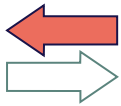

Implement the right HIPAA-compliant cloud solution for your rural healthcare organization's EHR, business, or ancillary systems with HITRUST risk-based certified managed cloud services—the industry gold standard for secure, reliable, and always-available infrastructure.

EHR ARCHIVE SOLUTIONS:

DOWNTIME DATA RESILIENCE, LIVE ARCHIVE, AND LEGACY EHR ARCHIVE

Maintain patient care and operations during planned or unplanned outages—especially in limited connectivity areas—with MTS' reliable downtime solution. Conserve data storage space and improve system performance by archiving and restoring historical data as needed.

EHR MIGRATION AND DATA CONVERSION

Whether moving to a new EHR or partnering with a health system, let MTS' team of EHR-certified, strategic advisory, and technical consultants lead your transition success strategy for optimal EHR adoption. Services span data mapping, testing, migration, and conversion support. Ensure you have the right data ready for day-one clinical decision making, patient care, and business processes for your facilities.
